

GPS eXchange Format (GPX) Reader

FORMAT NOTES:

- This format is not supported by FME Base Edition.

Overview

GPX (the GPS Exchange Format) is a lightweight XML data format for the interchange of GPS data (waypoints, routes, and tracks) between applications and Web services on the Internet. FME is capable of reading GPX 1.0 and GPX 1.1.

When reading GPX 1.0, the reader returns Bounds, Waypoint, Route, Routepoint, Track and Trackpoint features. When reading GPX 1.1, the reader returns Metadata, Waypoint, Route, Routepoint, Track and Trackpoint features.
